Assessment

Coordinated Entry Components

Quality Standards	Definition
Standardized access, assessment, and referral processes	All CE locations offer the equal access and the same assessment approach.
Prioritization	People with the greatest needs receive priority for any type of housing and homeless assistance. People are housed quickly without preconditions.
Low Barrier Housing and Housing First Orientation	CE process houses people quickly and does not screen people out for assistance because of a perceived barrier to housing or services.
Referral Protocols	Housing program have the capacity to accept all eligible referrals and a documented protocol exists for rejecting referrals
Ongoing planning and stakeholder consultation	Evaluating and updating the CE process using IS. Transparency of data and community ownership and problem solving strategies.
Aligned with HMIS	Align CE database with HMIS to collect and manage data associated with assessment, referral, and service delivery.
Work to increase homeless housing stock.	Reduce long waiting times and improve system functioning by increasing the housing stock.
Person Centered process and immediate service connections	The coordinated entry process incorporates participant choice, which may be facilitated by questions in the assessment tool or through other methods. Choice can include location and type of housing, level of services, and other options about which households can participate in decisions.
